**POSITION:** MEDICAL OR RESEARCH INTERN

**Description**

Hmong Cancer and Health, Inc. (HCH) is a non-profit organization working to provide health related activities to the Wisconsin Hmong communities. We are looking for an intern with good knowledge and understanding of medical or research background. The intern will do data and medical research relate to health issues.

**Responsibilities**

- Research for medical and health relate issues
- Gather data through interviews and/or field observation
- Conduct health needs assessments
- Support health related projects
- Help with other related activities

**Requirements**

HCH is looking for a college student in the Manitowoc area who is majoring in nursing, research, or health related fields. This person should have good verbal and written English communication skills. Knowledge of statistics, PowerPoint, Word and Excel experience is a bonus. Ability to speak Hmong will also be a bonus, but not require.

**Majors:** Nursing, biology, Pre-med, research, or other health related fields.

**Compensation:** Volunteer, but might qualify for reimbursement and/or scholarship
