**Profiling and criminal justice in America**

From Barnes and Noble: “In the post-9/11 world, profiling by law enforcement has become "standard operating procedure." Profiling by prosecutors, judges, and corrections officers is pervasive in other criminal justice contexts as well. Is profiling actually effective in preventing crime or identifying likely offenders and therefore justifiable? This accessible, single-volume reference book examines profiling as it pertains to the criminal justice system in the United States, providing non-partisan information that illuminates the full scope of the profiling issue and discusses the possible impact of profiling on all American citizens.”

**Unbroken**

From Publishers Weekly: “From the 1936 Olympics to WWII Japan's most brutal POW camps, Hillenbrand's heart-wrenching new book is thousands of miles and a world away from the racing circuit of her bestselling Seabiscuit. But it's just as much a page-turner, and its hero, Louie Zamperini, is just as loveable...It is impossible to condense the rich, granular detail of Hillenbrand's narrative of the atrocities committed (one man was exhibited naked in a Tokyo zoo for the Japanese to "gawk at his filthy, sore-encrusted body") against American POWs in Japan, and the courage of Louie and his fellow POWs, who made attempts on Watanabe's life, committed sabotage, and risked their own lives to save others. Hillenbrand's triumph is that in telling Louie's story (he's now in his 90s), she tells the stories of thousands whose suffering has been mostly forgotten. She restores to our collective memory this tale of heroism, cruelty, life, death, joy, suffering, remorselessness, and redemption.”

**Proof: a play**
From Library Journal: “After the death of her mathematical genius father, Catherine, who gave up her own study of mathematics to tend to him, claims that she is the author of a mathematical proof found in the attic among his unpublished, mostly incoherent notebooks by Hal, one of his former students. But what "proof" does Catherine have that she, and not her father, is the author?... This wonderful play has already won the Kesselring Prize for Auburn, also a recipient of a Guggenheim Fellowship. Proof's deft dialog, its careful structure, and the humanity of the central characters are themselves proof of a major new talent in the American theater.”

How things work: the physics of everyday life

From Barnes and Noble: “Offers a non-conventional view of physics and science that starts with whole objects and looks inside them to see what makes them work. Uses everyday objects to appeal to readers and motivate their interest of the scientific principles that govern our universe.”

QC21.3 .B56 2013

Planetary science: the science of planets around stars

From Barnes and Noble: “Avoiding excessive details, this textbook offers a comprehensive account of stellar and planetary topics. It is suitable for students from a range of disciplines, including astronomy, geology, and earth sciences. The book provides students with an understanding of the nature of the Solar System and the influences that govern its behavior, helping them develop an appreciation of the forces that can influence our planet in the future.”

QB501 .C65 2013

The Oxford companion to American politics, v.1-2

From Library Journal: “The list of entries, topical outline, and index (running to almost 100 pages) make it easy to find topics such as the Arab Spring or the Black Panthers that do not have their own entries but are discussed within other
essays. VERDICT High school and college libraries needing a compact and intelligent overview of topics will find this a well-organized, well-written, and useful addition to their collections.”

JK275 .O94 2012

Physics, 9e

From Booknews: “Designed for students and teachers who are partners in a one-year course in physics that uses algebra and trigonometry, this text is intended to help students develop conceptual understanding and use it in solving problems. Subject areas include mechanics, thermal physics, wave motion, electricity and magnetism, light and optics, and such modern fields as special relativity and nuclear physics. A CD-ROM contains interactive problem-solving software and numerous simulations of physical phenomena.”

QC 23.2 .C87 2012

Conceptual physics, 12th ed.

From Barnes and Noble: “...With this strong foundation, readers are better equipped to understand the equations and formulas of physics, and motivated to explore the thought-provoking exercises and fun projects in each chapter. Icons in this new edition direct readers to The Physics Place web site (www.physicsplace.com) where they will find interactive and animated tutorials, video demonstrations, and hundreds of problems and activities. This new text-media combination gives readers more of what they need -whether it's animated explanations or interactive exercises -to make the connections between the concepts of physics and their everyday world. For college instructors and students.”

Dog sees God: confessions of a teenage blockhead

From Barnes and Noble: “When CB’s dog dies from rabies, CB begins to question the existence of an afterlife. His best friend is too burnt out to provide any coherent speculation; his sister has gone goth; his ex-girlfriend has recently been institutionalized; and his other friends are too inebriated to give him any sort of solace. But a chance meeting with an artistic kid, the target of this group’s bullying, offers CB a peace of mind and sets in motion a friendship that will push teen angst to the very limits. Drug use, suicide, eating disorders, teen violence, rebellion and sexual identity collide and careen toward an ending that’s both haunting and hopeful.”
**The good person of Szechwan**

From Barnes and Noble: “When three gods come to earth in search of a thoroughly good person, they encounter Shen Teh, a goodhearted but penniless prostitute, who offers them shelter. Rewarded with enough money to open a tobacco shop, 'Angel of the Slums' Shen Teh soon becomes so overwhelmed by the demands of people seeking assistance that she invents a male alter ego, 'Tobacco King' Shui Ta, to deal ruthlessly with the business of living in an evil world. *The Good Person of Szechwan* is a masterpiece of minimalist design and elegance that shines a light on human nature and social mores.”

**Winds of Fate**

From book cover: “Long ago Gehanna’s memory failed her. She woke upon the blood soaked field with no knowledge of who she was or where she came from. But her skill on the trail and with the bow were unmatched and she took up the trade of a warrior. She founded a brotherhood in the town of Bravenn to plunder the world of adventure and thus it was that she found herself in the midst of the filth and fear of the Witch Queen’s poison.”

**Top Girls**

From Barnes and Noble: “Marlene has been promoted to managing director of a London employment agency and is celebrating. The symbolic luncheon is attended by women in legend or history who offer perspectives on maternity and ambition. In a time warp, these ladies are also her co workers, clients and relatives. Marlene, like her famous guests, has had to pay a price to ascend from proletarian roots to the executive
suite: she has become, figuratively speaking, a male oppressor and even coaches female clients on adopting odious male traits. Marlene has also abandoned her illegitimate and dull witted daughter. Her emotional and sexual life has become as barren as Lady Macbeth’s.”
